Supplemental Investigation Report			
Case # 071023-14		Detective Friday	
Date of Initial Investigation 10/26/07	Date Report Prepared: 01/31/09		
Location of Incident/Street Address Arcane Park	City Lake of the Isles	County Marion	
Type of Incident/Crime/Description of events Homicide – arsenic poisoning			
Victim – Duke Kenilworth (deceased)			
Supplemental Investigation Report			
<p>06-30-08 Received anonymous call, disguised mechanically. Unable to identify caller or gender of caller. Caller states belief that Duke Kenilworth was murdered by poison on the night of Running of the Gauntlet by someone in, or involved with, <i>Carpe Diem</i>. Retrieved five beer mugs from evidence room and delivered to toxicology to specifically test for poison.</p> <p>07-08-08 Toxicology report received. Beer mug engraved "Duke" tested positive for arsenic. Other mugs tested negative for poisons.</p> <p>07-15-08 Reported recent findings to Coroner Wright. Requested exhumation of Kenilworth body to test for arsenic poisoning. Request denied by coroner.</p> <p>07-18-08 Interviewed Austin Tayshus regarding incidents of 10-26-07. Asked Tayshus if anyone would have a reason to murder Kenilworth by arsenic poisoning added to Kenilworth's beer. Tayshus identified Les Hayes, who, as described by Tayshus, suffered the cruelty of Kenilworth, physically and emotionally, and was humiliated publicly by Kenilworth at the Running of the Gauntlet by receiving the Flunky award and "tared and feathered." Tayshus reported that Hayes believed that he/she was selected as a pledge only for a cruel joke by Kenilworth. Tayshus reported that Hayes was vengeful in nature, and had access to both the beer mug and arsenic. Tayshus reported Hayes was the Chemistry lab assistant at the time and had access to the locked cabinet containing the arsenic. Tayshus also reported that Hayes was the last pledge to serve beer to Kenilworth before his demise.</p> <p>07-21-08 Contacted Hayes family by telephone and scheduled interview for July-22-08 with parents present.</p> <p>07-22-08 Arrived at home of Hayes. Read Hayes' Miranda rights, with parents present. Before beginning questioning, Hayes stated that he/she did not kill Kenilworth. Inquired of Hayes about knowledge of arsenic usage and fatal qualities. Hayes claimed to have no knowledge of the potent properties of arsenic. Hayes also denied knowledge of whether arsenic was stored in the Chemistry lab at Elite. Hayes admitted that Kenilworth hazed him/her, but Hayes had no resentment, as he/she knew it was part of the process of the initiation process.</p> <p>07-23-08 "Duke" beer mug sent to lab for fingerprint analysis.</p> <p>07-24-08 Obtained search warrant for Hayes' school locker, the Elite Chemistry room, and Hayes' residence. Observed arsenic bottle is contained in locked cabinet of Chemistry room. Bottle labeled arsenic trioxide was empty. Interviewed Dr. Lowe. Lowe stated that Hayes had access to locked cabinet during school year. Lowe did not observe Hayes taking arsenic. Lowe did not have any conversations with Hayes regarding arsenic fatal properties. Lowe could not recall if any Chemistry lab experiments or exercises would have required the use of arsenic during the school year. Lowe believed arsenic trioxide bottle would have been full at the beginning of the school year, as it is his/her routine and practice to replenish all inventory supplies. Located book on Napoleon and a note in Hayes' locker, which appears to be Latin. Delivered to translator. Nothing further found in Chemistry room, cabinet or Hayes' locker. No incriminating evidence located at Hayes' residence.</p>			
Case # 071023-14 Supplemental Investigation Report Page 2			
08-6-08 Fingerprint analysis results received. Fingerprint analysis on "Duke" beer mug shows no detectable prints except Kenilworth and Tayshus.			

08-15-08 Additional fingerprint analysis results received. Fingerprint analysis shows that Hayes' fingerprints are on the key, the lock, and the cabinet where the arsenic trioxide bottle was located in the Chemistry classroom at Elite Preparatory High School. Hayes fingerprints were also detected on the bottle labeled arsenic trioxide that was located in the Chemistry lab's locked cabinet.

8-25-08 Translation received from Latin note in Hayes' locker. Vengeful and morbid overtones.

08-26-08 Interviewed Hayes a second time, in presence of parents and upon being advised of Miranda rights. Hayes admitted that Latin note is his/hers. Hayes explains that the note is a poem by Horace, in which the phrase *Carpe Diem* was used. Hayes states that he/she memorized the poem to impress the members of *Carpe Diem* to ensure initiation into the club. Hayes admits to lying to me previously about lack of knowledge of fatal properties of arsenic. Hayes claims afraid that if admitted it, it would make him/her look guilty.

8-29-08 Reported additional findings to Coroner Wright. Requested exhumation of Kenilworth. Coroner Wright denies request.

01-15-09 Reported findings to Coroner Muir. Muir signs paperwork for exhumation.

1-23-09 Consent obtained from Kenilworth family for exhumation of son, Duke.

1-26-09 Duke Kenilworth's body exhumed. Significant decomposition of body due to natural burial.

03-26-09 Toxicology report received. Arsenic detected in remains of Kenilworth's body.

03-30-09 Coroner Muir's report concludes, based upon recent toxicology report, that victim died from arsenic poisoning.

03-31-09 Hayes arrested.
